

# Airesun Protective Coating

## Biodegradable Speciality Protective Coating

### Description:

Our Airesun Protective Coating is a low-to-medium viscosity product that immediately goes to working through surface rust and replacing with a nano skin of hydrophobic natural oil protection. It is used industrially to coat and protect products that may be exposed to the elements by creating a barrier to the moisture that creates unwanted fly rust on untreated metals.

This product is listed by the [NSF](#) as acceptable for use as a Release Agent (3H).

### Applications:

Spray-on protection for the transport and storage of mechanical fasteners, springs, metal apparatus, hinges, or any other metal surface that may be exposed to weather or be compromised due to condensation.

### Airesun Protective Coating has the following characteristics:

- Easy to use, requires no special handling.
- 100% biodegradable < 60 days, non-toxic,
- Contains no VOC's, detergents, petroleum or CFC's.
- Non-irritant, and completely non-toxic.
- No long-term environment damage if discharged into soil or water.
- Flash point is +130°C, no restrictions for transport or storage.
